

HEM INDUSTRIES

COMPANY PROFILE · ELECTRIC MOTOR MANUFACTURING · DAMAN

COMPANY INTRODUCTION

HEM Industries is one of India's leading electric motor manufacturers, with over five decades of experience in delivering reliable, high-quality and innovative motor solutions.

With a strong focus on quality, reliability, timely delivery and customer satisfaction, the company has built a trusted presence across India and international markets.

COMPANY OVERVIEW

The company is backed by offices, authorized distributors, dealers and service centers that support **OEMs, end users and major industries**.

An ISO 9001:2015 certified company, HEM Industries operates state-of-the-art manufacturing facilities in **Daman**, supported by advanced technology and experienced professionals.

MANUFACTURING FACILITIES

QUALITY & FACILITIES

An ISO 9001:2015 certified company operating state-of-the-art manufacturing facilities in Daman, supported by advanced technology and experienced professionals. Our commitment: **reliable, high-quality motors, timely delivery, and technical support for OEMs and end users.**

KEY OPERATIONS UNDER ONE ROOF

- 1 Motor assembly lines with highly skilled workforce
- 2 Stator winding with automatic test system
- 3 Insulation processing & Vacuum Pressure Impregnation (VPI)
- 4 Testing laboratory & stringent quality control
- 5 Material & motor inspection with advanced instruments
- 6 Advanced laser printing for rating plates

Every key stage of motor manufacturing is carried out in-house, helping maintain consistent quality, reliable performance and timely delivery.

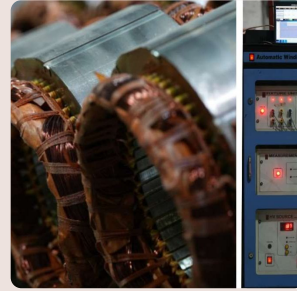

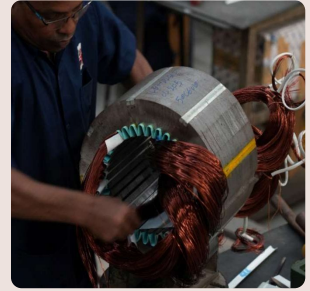

HEM INDUSTRIES

MANUFACTURING CAPABILITIES · IN-HOUSE FACILITIES

MOTOR ASSEMBLY

Dedicated assembly lines supported by a skilled and experienced workforce. Our facilities are designed to ensure accurate component fitting, proper alignment and consistent assembly quality, with attention to workmanship and dimensional accuracy.

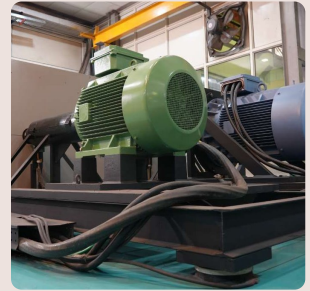

STATOR WINDING

In-house stator winding with an automatic winding test system that checks winding parameters to identify defects, and manual winding for different motor designs, with attention to proper coil placement and workmanship.

INSULATION & VPI

Dedicated facilities for stator insulation processing and Vacuum Pressure Impregnation. VPI helps the insulating resin penetrate the winding system, supporting insulation integrity, mechanical strength and resistance to operating stresses.

TESTING & QUALITY CONTROL

Quality checks are carried out at relevant manufacturing stages to identify deviations and maintain consistency. The in-house testing laboratory supports motor testing and performance verification against applicable specifications.

MATERIAL & MOTOR INSPECTION

Incoming materials and components are inspected with appropriate measuring instruments. During and after manufacturing, inspections verify critical dimensions, component fitment and overall product quality.

LASER-PRINTED RATING PLATES

An advanced laser printing machine provides clear, precise and durable marking of motor type, rated power, voltage, current, speed, frequency and other technical specifications.

PRODUCT RANGE · QUALITY · CONTACT

PRODUCT RANGE · FRAME SIZES

IE5 Induction Technology Motors

FRAME SIZE
Up to 280MX

IE4 Super Premium Efficiency Motors

FRAME SIZE
71 to 315LX

IE3 Premium Efficiency Standard Motors

FRAME SIZE
63 to 355LX

Duplex Cooling Motors

FRAME SIZE
355 to 400LX

Flameproof High Efficiency Motors (IE4, IE3, IE2)

FRAME SIZE
63 to 355LX

Atex Flameproof Motors

FRAME SIZE
63 FLP to 315LX FLP

Multi Speed Flameproof Motors

FRAME SIZE
71 to 315L

Fire Fighting Motors

FRAME SIZE
100L to 315LX

Crane Duty Motors, Standard & Flameproof

FRAME SIZE
71 to 315LX

Cooling Tower Motors, Standard & Flameproof

FRAME SIZE
71 to 315LX

Inverter Duty Motors

FRAME SIZE
100L to 355LX

Smoke Extraction Motors

FRAME SIZE
71L to 280L

Roller Table Motors

FRAME SIZE
112M to 200L

Brake Motors

FRAME SIZE
63 to 250MX

Textile Motors

FRAME SIZE
100L to 180L

Aluminium Motors

FRAME SIZE
63L to 132L

OUR COMMITMENT TO QUALITY

Quality and consistency are important considerations throughout the manufacturing process. We focus on:

- Reliable, high-quality motors
- Quality checks at relevant manufacturing stages
- Timely delivery
- In-house testing laboratory
- Technical support for OEMs & end users
- Inspection of materials and motors

Our objective is to deliver dependable motor solutions for a wide range of industrial applications.
